

# THERE'S A SAFER WAY TO DETERMINE WATER IN CRUDE OIL.

WATERMARK® Crude Oil Reagent Kits include double ended ampoules containing the KF generator solution - **THE ULTIMATE** in safety & convenience. Packed under vacuum, the generator solution doesn't come out of the ampoule until the second end is snipped.

- **Crack and Pour** for ease and speed - no measuring, no glassware to wash.
- **Snip Tool** reduces glass cuts. Snipped tips remain in tool.
- **Specially formulated** for crude oil applications to ensure complete sample dissolution.
- **Compatible** with all titrator brands.

Watch how it works!

## KIT CONTAINS:

- 8x100 mL bottles of anolyte
